HOME CHARGING SOLUTIONS

The Wallbox Pulsar Plus charging solution, charging your Peugeot Fully Electric vehicle at home is not only convenient, but cost-effective too.

Charging your Peugeot Fully Electric through a Wallbox is not only 4x times faster than with the standard Mode 2 cable, it allows you to charge when electricity is at its cheapest. The Wallbox smart charging solution enables the exchange of data between your car, the grid and the charger, giving you complete control over its performance and your overall energy consumption.

Black
PEVCPULSARPLB
White
PEVCPULSARPLW

\$2150

PULSAR PLUS WALLBOX

Compact

Smaller than a toaster and lighter than a laptop.

Powerful

Up to 22kW of charging capacity, up to 8x faster than a standard charger.

Connected

Connects to your smart devices via Wi-Fi or Bluetooth.

HOME CHARGING INSTALLATIONS

There are significant benefits to charging at home with a Wallbox solution.

With the convenience of the vehicle parked at home overnight, it's easy to plug in when you get home, then use the Wallbox app to program the charge after 11pm and take advantage of low-cost off-peak electricity through the night.

Your FULLY ELECTRIC vehicle is ready in the morning and fully charged without worry. The latest research found that 82% of electric cars in New Zealand are charged at home.

Once installed, the Wallbox can start saving you money. The savings are immediate by ensuring you are connected to the best possible electricity rates.

Imagine a year's worth of driving for just \$500. That's less than \$10 per week.
